IOELU ATUATASI

Network Operations Center (NOC) Engineer

PROFESSIONAL SUMMARY

Dedicated IT Professional with 20+ years of expertise in network operations, system monitoring, troubleshooting, and customer support. Known for delivering exceptional client service, clear communication, and comprehensive issue documentation. Proficient in a wide range of networking technologies and skilled at collaborating effectively in fast-paced, high-pressure environments. Currently pursuing certifications and expanding expertise in cloud technologies, including AWS and Microsoft Azure, to transition into the cloud industry and drive innovation in modern IT infrastructure.

EMPLOYMENT HISTORY

NOC SYSTEMS ENGINEER **Feb 2025 - May 2025**
Parler Cloud Technologies (acquired Edgio assets) ***Remote***

- Continued same duties from Edgio after assets were acquired by Parler.
- Maintained NOC operations, monitoring, and incident response during the transition.
- Responsibilities remained consistent with prior role.

NOC SYSTEMS ENGINEER / NOC TECHNICAL SUPPPORT ANALYST **Apr 2017 - Jan 2025**
Edgio (formerly Verizon Digital Media Services) ***Remote***

- Diagnosed and resolved hardware issues on Dell Edge Servers using a range of diagnostic tools:
  - Leveraged Dell iDRAC, OpenManage Server Administrator, and Lifecycle Controller.
  - Used Linux tools such as smartctl, syslogs, dmesg, and journalctl to identify and analyze critical hardware problems, including bad drives, memory failures, and CPU errors.
  - Accessed and managed edge servers remotely using connectivity tools like Remote Desktop and SSH to effectively identify and escalate issues.
  - Ensured optimal server performance and reliability through proactive issue resolution and regular monitoring.
- Troubleshot packet loss and collaborated with network engineers and providers to mitigate issues related to routing, switching, TCP/IP, BGP, and OSI model challenges.
  - Used tools such as Looking Glass and MTRs to identify packet loss and determine its root cause.
  - Leveraged additional monitoring platforms, including Kibana, Prometheus, Grafana, Catchpoint, and others, to track and analyze network performance.
- Monitored, identified, and escalated SVN issues (SVN Masters and SVN Mirrors) to the Engineering team for resolution.
- Monitored and analyzed video platform (Uplynk) performance using Splunk and Datadog, ensuring high availability and proactively resolving issues.
- Created and maintained comprehensive procedures and troubleshooting guides in Confluence, covering:
  - Data center and vendor power maintenance processes, including proactive vulnerability checks, change management, and outage planning.
  - Monitoring alerts (health checks, networking, traffic events) with detailed troubleshooting steps.
  - High-priority incidents managed using ITIL-aligned practices, including identification, impact assessment, team engagement, communication setup, updates, mitigation steps, and actionable items for post-incident reviews.
- Tracked and recorded technical details and status updates for all incidents using ServiceNow and JIRA, ensuring accurate communication and issue resolution.
- Contributed to process improvement initiatives to enhance response times and overall service delivery within the NOC team.

NOC TECHNICAL SYSTEMS SUPPORT ANALYST **Jul 2010 - Mar 2017**
Christie Digital Systems, Inc. ***Cypress, CA***

- Coordinated and executed remote upgrades for media servers and digital projectors, ensuring uninterrupted functionality.
- Performed remote diagnostics and support for digital audio/video hardware, including software upgrades, to maintain optimal performance.
- Collaborated with the Training and Development team to refine troubleshooting methodologies, enhancing incident resolution efficiency.
- Delivered Tier 1 and Tier 2 support to internal teams and field engineers, resolving complex hardware and network issues on Windows and Linux systems.
- Developed and maintained troubleshooting guides in a wiki knowledge base, standardizing procedures for resolving common technical issues.

NOC TECHNICAL LEAD **Jan 2006 - Jun 2010**
Christie Digital Systems, Inc. ***Cypress, CA***

- Directed daily operations of the NOC team, optimizing workflows and ensuring high team performance.
- Provided Tier 2 support for escalated technical challenges, collaborating closely with engineering teams to resolve complex cases.
- Acted as the primary escalation point for field engineers, third-party technicians, and analysts, ensuring swift resolutions.
- Delivered detailed technical trend analyses and actionable insights to NOC management, improving operations and service delivery.
- Analyzed operational reports to track performance metrics and ensure adherence to Service Level Agreements (SLAs).

NOC SERVICE DESK ANALYST **Sep 2003 - Dec 2005**
Christie Digital Systems, Inc. ***Cypress, CA***

- Managed Service Desk operations, supporting multi-platform environments for network devices and servers.
- Utilized SNMP-based tools to monitor and optimize network performance, diagnosing and resolving issues on Windows and Linux systems.
- Mentored and trained junior team members, improving their troubleshooting skills and adherence to best practices.
- Monitored over 100,000 network components and applications, proactively identifying and resolving potential service interruptions.
- Assisted field engineers and digital cinema clients with advanced technical issues, maintaining peak system performance.

EARLY CAREER EXPERIENCE **Aug 1998 - Feb 2002**

- Data Center/NOC Analyst, Fourthstage Technologies (formerly Webvision) (2000–2002): Ensured optimal performance of customer websites and bandwidth by monitoring servers, routers, and switches via SNMP tools. Provided remote hands support for data center equipment, proactively resolving performance issues.
- Provision Coordinator/Technical Support Rep, Zyan Communications (1999–2000): Coordinated DSL installations, troubleshot connectivity and CPEs, and worked with field technicians and engineers.
- Technical Support Specialist, Stamps.com (1999–1999): Provided technical support via phone calls and emails. Troubleshot software installation and printing issues while supporting integrations with third-party platforms.
- Technical Support Specialist, Microdyne Outsourcing (1998–1999): Provided technical support via phone calls and emails. Diagnosed hardware issues for Epson printers and Memorex peripherals on Windows and Mac platforms.

SKILLS

- Microsoft Server Operating Systems**:** Experience with Windows Server Operating Systems. Working knowledge of Active Directory, Group Policy management, DNS, and DHCP.
- Linux Administration**:** Experience with Ubuntu (Debian-based) and Red Hat-based distributions (RHEL, CentOS, Fedora) for operating system installaion, configuration, and maintenance.
- Networking Protocols: TCP/IP, UDP, DNS, DHCP, HTTP/HTTPS, FTP/SFTP, SNMP, SSH, NTP, BGP.
- AWS Cloud Platform: Skilled in creating EC2 instances, VPCs, subnets, routing tables, internet gateways, NAT instances/gateways, NACLs, security groups, auto scaling groups, load balancers (ALB/NLB), Route 53, Elastic Kubernetes Service (EKS), Elastic Container Service (ECS), AWS Fargate, AWS Lambda, AWS API Gateway.
- Identity and Access Management: Experience with creating IAM users, groups, roles, and policies.
- Storage and Databases: Experience with S3 buckets and Amazon DynamoDB, Amazon RDS, PostgreSQL, and MySQL.

EDUCATION & CERTIFICATIONS

KODECLOUD - PROFESSIONAL TRAINING ***Online***

- Azure Fundamentals (AZ-900) – In Progress
- Python & Bash Scripting – Ongoing
- Linux & Kubernetes Essentials – Hands-on Labs

AWS CLOUD PRACTITIONER/SOLUTIONS ARCHITECT **Jul 2024 - Dec 2024**
NPower

- AWS Cloud Practitioner Certification
  Earned Aug 2024
- AWS Solutions Architect
  Completed NPower's AWS Solutions Architect training program. Certification exam pending.

COMPTIA A+ & MCSE 2000 **Dec 2001 - Jul 2002**
Computer Education Institute ***Carson, CA***

- CompTIA A+ & MCSE 2000 (Dec 2001 – Jul 2002)
