IOELU ATUATASI

NOC ENGINEER | CLOUD & INFRASTRUCTURE SPECIALIST

PROFESSIONAL SUMMARY

Experienced IT professional with 20+ years in Network Operations Center (NOC) environments, specializing in incident management, enterprise infrastructure monitoring, process documentation, and system integrity. Proven ability to handle 24/7 mission-critical operations, troubleshoot complex hardware/network issues, and improve system reliability. Currently expanding expertise in AWS and Azure cloud platforms.

CORE COMPETENCIES

- NOC Monitoring & Incident Response
- SNMP-Based Tools: Prometheus
- Monitoring & Observability Platforms: Grafana, Catchpoint, Datadog, Splunk
- On-Premise Data Center Operations (24/7)
- Process Documentation (Confluence, KB)
- Change & Problem Management (ITIL, JIRA, ServiceNow)
- Server Diagnostics (Linux: smartctl, dmesg, journalctl; Windows: Event Viewer, iDRAC, Performance Monitor)
- Networking Protocols: TCP/IP, BGP, SNMP, DNS, DHCP
- Cloud Technologies: AWS (EC2, VPC, S3, IAM), Azure (in progress)

EMPLOYMENT HISTORY

NOC SYSTEMS ENGINEER **Feb 2025 - May 2025**
Parler Cloud Technologies (acquired Edgio assets) ***Remote***

- Maintained NOC operations post-acquisition, continuing support and system uptime.
- Documented incident processes and delivered KB updates for high-priority alerts using JIRA and Notion for documentation and workflow tracking.

NOC SYSTEMS ENGINEER **Apr 2017 - Jan 2025**
Edgio (formerly Verizon Digital Media Services) ***Remote***

- Diagnosed and resolved hardware issues on Dell Edge Servers using smartctl, iDRAC, journalctl, and SSH.
- Monitored infrastructure and video platform performance (Uplynk) via Splunk, Datadog, Kibana, Prometheus, and Grafana.
- Mitigated packet loss and routing/switching issues through BGP, TCP/IP analysis with MTRs and Looking Glass.
- Created detailed Confluence KBs for infrastructure maintenance, outage planning, and incident documentation.
- Managed end-to-end incident response using ITIL practices, JIRA, and ServiceNow platforms.
- Partnered with Engineering and Ops to enhance workflow efficiency and implement rapid resolution playbooks.
- Utilized Slack and Microsoft Teams for real-time communication, team coordination, and monitoring alerts.

NOC TECHNICAL LEAD / SYSTEMS SUPPORT ANALYST **Sep 2003 - Mar 2017**
Christie Digital Systems, Inc. ***Cypress, CA***

- Managed 24/7 NOC operations, Tier 1 and Tier 2 support, and field escalations.
- Directed daily workflows and SLA performance metrics.
- Performed diagnostics for audio/video hardware, media servers, digital projectors, and network devices.
- Developed and maintained troubleshooting guides in a wiki knowledge base.
- Trained junior techs, optimized SNMP monitoring, and supported over 100,000 nodes.
- Delivered incident trend analyses and insights to NOC management.
- Assisted digital cinema clients with advanced technical support.

SERVICE DESK & TECHNICAL SUPPORT **1998 - 2001**

- Fourthstage Technologies (Webvision) – Monitored servers, routers, and switches; provided remote hands support and resolved performance issues for hosted web environments.
- Zyan Communications – Coordinated DSL installs, supported CPE and connectivity issues, and worked closely with field techs and engineers.
- Stamps.com – Provided phone and email support for software installation and printing issues; supported third-party platform integrations.
- Microdyne Outsourcing – Delivered technical support for Epson printers and Memorex peripherals on both Windows and Mac.

EDUCATION & CERTIFICATIONS

- **AWS Solutions Architect Training** – NPower, 2025 (Exam Pending)
- **AWS Cloud Practitioner** – Certified, 2024
- **Azure Fundamentals (AZ-900)** – In Progress via KodeKloud
- **Python & Bash Scripting** – Ongoing via KodeKloud & freecodecamp
- **Linux Essentials** – Hands-on Labs via KodeKloud
- **CompTIA A+ & MCSE 2000** – Certified, 2002

NOTES

Familiar with SNMP-based monitoring platforms; rapidly adaptable to SolarWinds. Open to hybrid/remote roles across NOC, infrastructure, and cloud operations.
